

Atomic Structure

Protons, Neutrons, and Electrons

Proton

- Positive charge
- Found in the nucleus

Neutron

- No charge
- Found in the nucleus

Electron

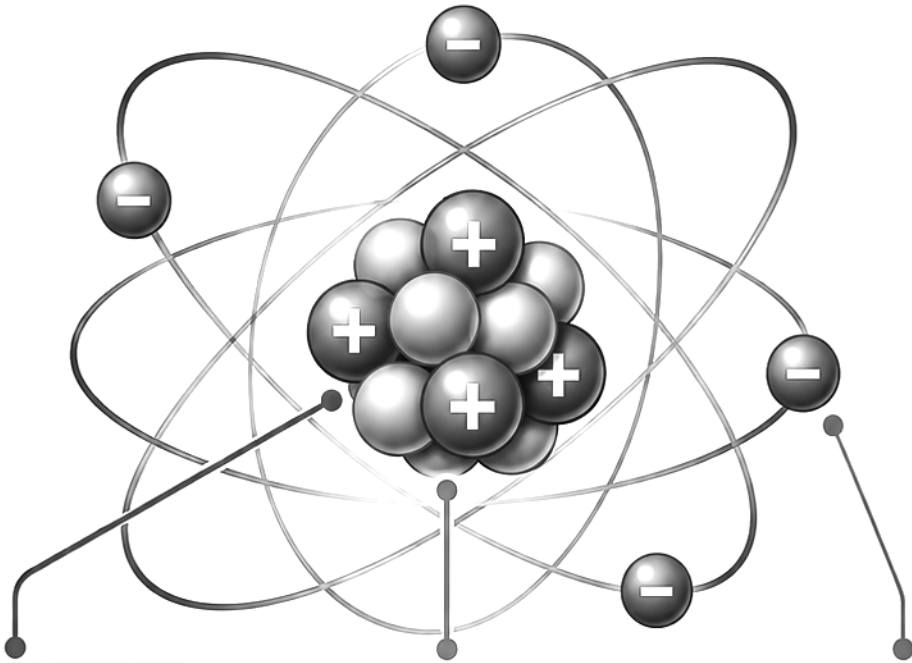

- Negative charge
- Moves around the nucleus

Atoms have a nucleus made of **protons** and **neutrons**, with **electrons** moving around it.

Atomic Structure

Protons, Neutrons, and Electrons

Proton

- Positive charge
- Found in the nucleus

Neutron

- No charge
- Found in the nucleus

Electron

- Negative charge
- Moves around the nucleus

Atoms have a nucleus made of protons and neutrons, with electrons moving around it.
