

Day, Night & Seasons

Earth in motion

1 Rotation

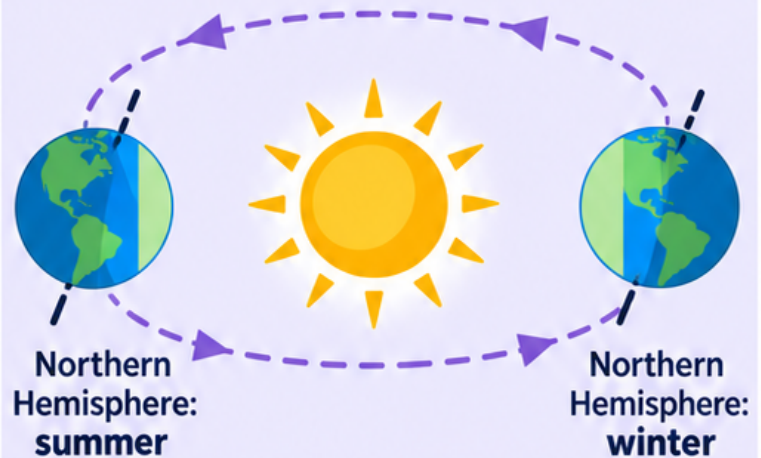

Earth spins once a day on its axis.

- ✓ The lit side has day and the dark side has night.
- ✓ One complete spin takes about **24 hours**.

2 Revolution

Earth orbits the Sun once a year, with a tilt.

Opposite seasons in the Southern Hemisphere.

- ✓ The tilt of Earth's axis causes the seasons.
- ✓ One complete orbit takes about **365 days** (one year).

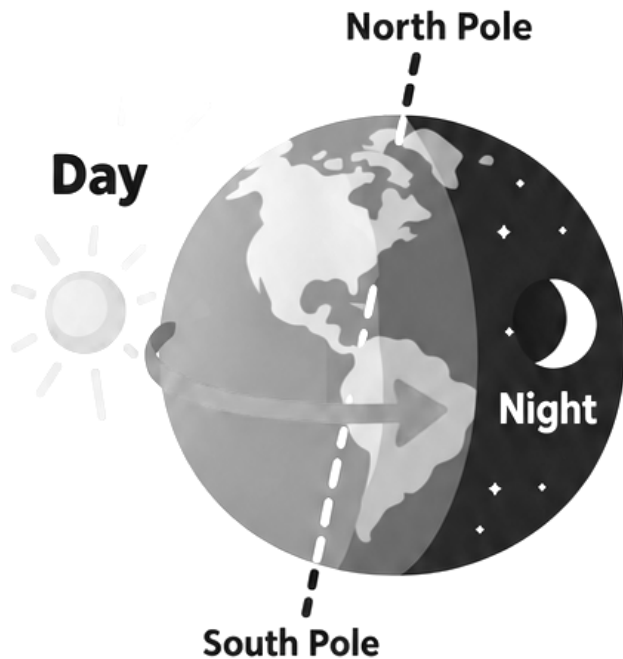

**Rotation makes day and night;
revolution and tilt make the seasons.**
