

Food Chains & Ecosystems

Energy flows from the Sun

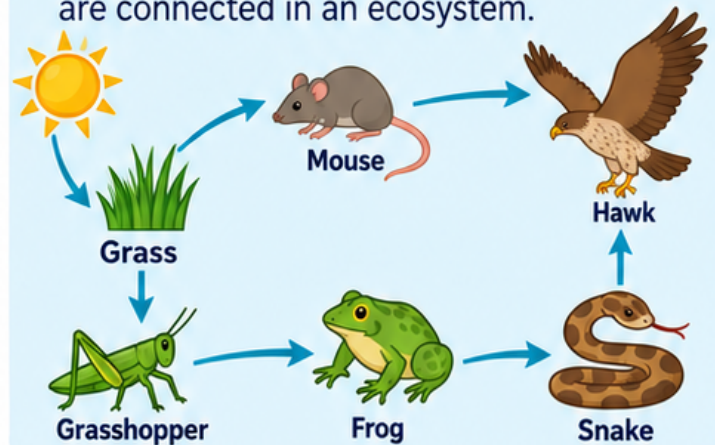

Food Chain

A food chain shows a simple path for energy from one organism to another.

Food Web

A food web shows how many food chains are connected in an ecosystem.

6 Decomposer

Decomposers break down dead plants and animals into smaller parts, returning nutrients to the soil.

Fungi

Bacteria

Decomposers recycle nutrients back to the soil.

Healthy Ecosystems

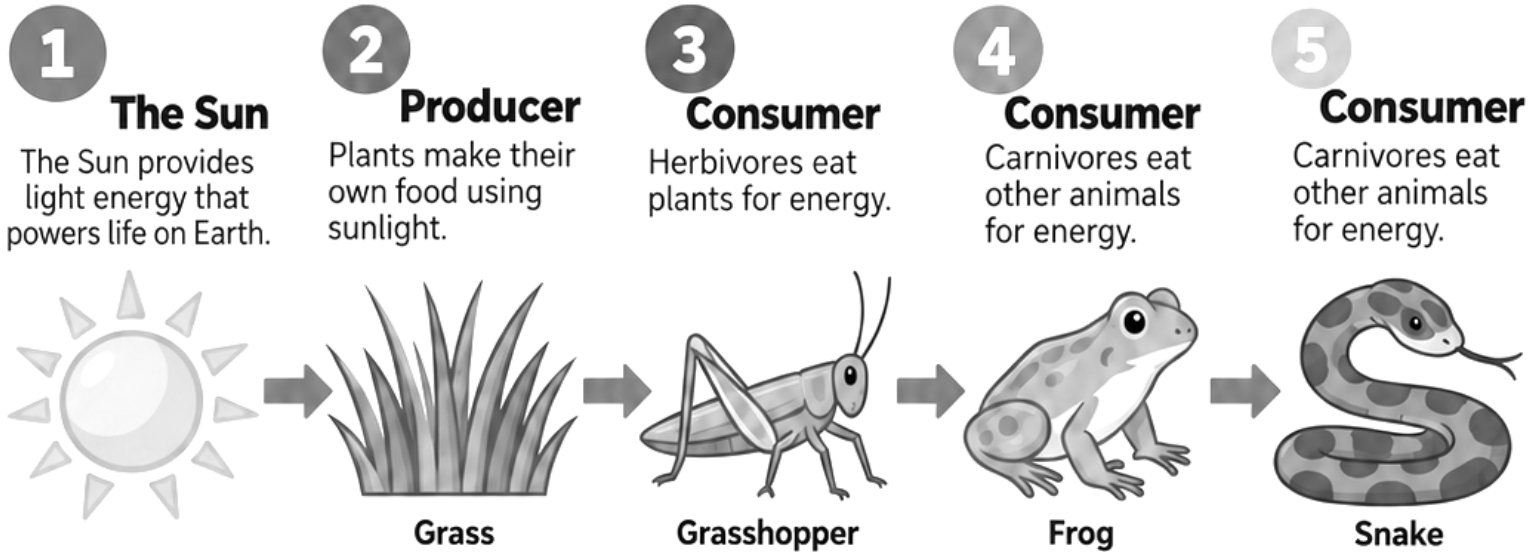

- ✓ Many living things depend on each other.
- ✓ Energy flows through food chains and food webs.
- ✓ Decomposers return nutrients to the environment.
- ✓ A balanced ecosystem keeps life healthy.

Arrows point in the direction the energy flows – toward the eater.
