

Force, Motion & Energy

FIVE CUE CARDS

Big ideas to help you explore how our world works!

1

Forms of Energy

Energy can take many forms, and it can change from one form to another.

2

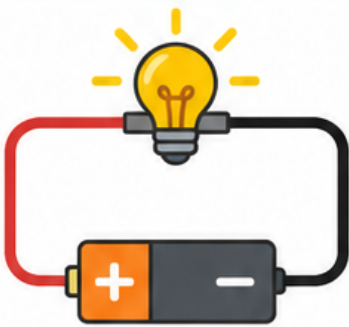

Light Energy

Light energy helps us see, travels in straight lines, and can be reflected, refracted, or absorbed.

3

Electricity & Circuits

Electricity is a form of energy that moves through circuits to power things.

4

Force & Motion

Forces can start, stop, speed up, slow down, or change the direction of an object.

5

Heat & Thermal Energy

Heat is thermal energy that moves from warmer objects to cooler objects.

KEY IDEA:

Energy and forces are all around us, and they help explain how our world changes.
