

Forms of Energy

Energy is the ability to cause change.

1

Mechanical Energy

The energy of motion and position.

A moving bicycle has mechanical energy.

2

Light Energy

The energy of electromagnetic waves that we can see.

A lamp gives off light energy.

3

Sound Energy

The energy of vibrations that we can hear.

A ringing bell gives off sound energy.

4

Thermal Energy (Heat)

The energy of the random motion of particles.

A stove burner gives off thermal energy.

5

Electrical Energy

The energy of moving electric charges (electrons).

A plug delivers electrical energy.

Energy can change from one form to another.
