

Measuring Matter

Which tool? Which unit?

1

Mass

Use a balance to measure mass.

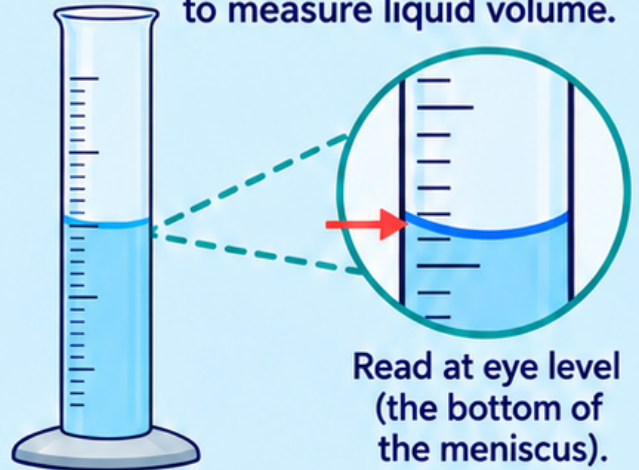

Unit: grams (g)

2

Volume of a liquid

Use a graduated cylinder to measure liquid volume.

Unit: milliliters (mL)

3

Length

Use a ruler to measure length.

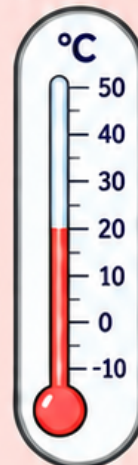

Align one end with 0. Read the other end.

Unit: centimeters (cm)

4

Temperature

Use a thermometer to measure temperature.

The temperature is 20 °C.

Unit: degrees Celsius (°C)

Match the tool and unit to what you're measuring.

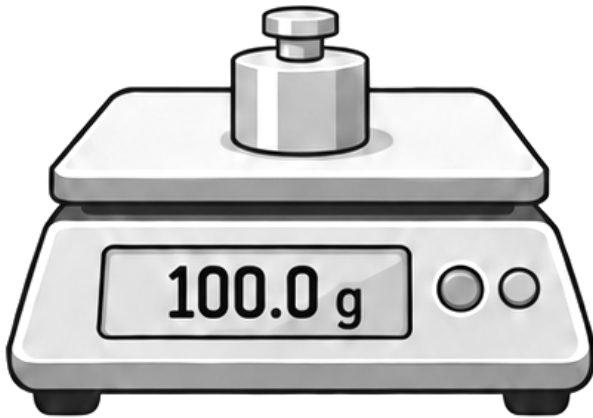

Measuring Matter

Which tool? Which unit?

1

Mass

Use a balance to measure mass.

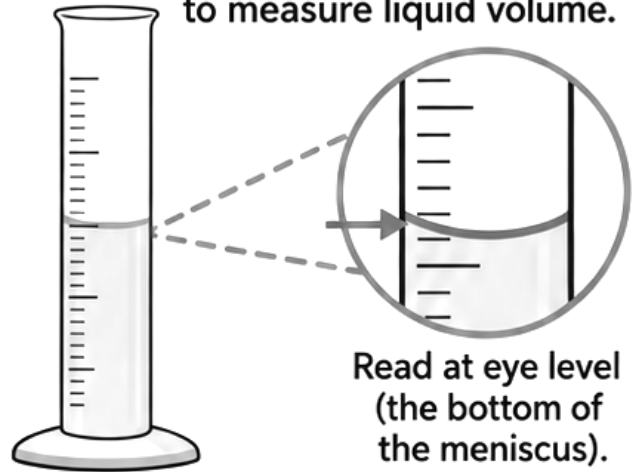

Unit: grams (g)

2

Volume of a liquid

Use a graduated cylinder to measure liquid volume.

Read at eye level
(the bottom of
the meniscus).

Unit: milliliters (mL)

3

Length

Use a ruler to measure length.

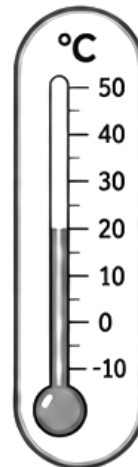

Align one end with 0. Read the other end.

Unit: centimeters (cm)

4

Temperature

Use a thermometer to measure temperature.

The temperature
is 20 °C.

Unit: degrees Celsius (°C)

Match the tool and unit to what you're measuring.
