

Physical Properties

Observe & measure

1

Mass

Mass is the amount of matter in an object.

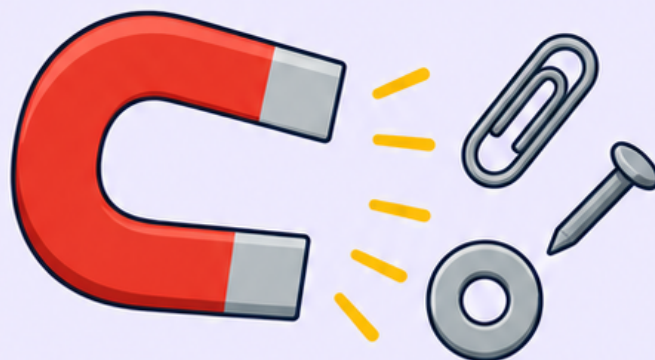

Mass = 150 g

2

Magnetism

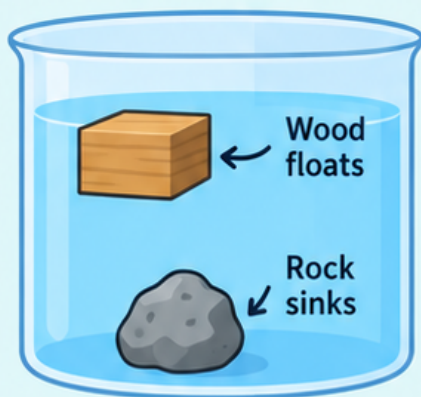

Some materials are attracted to magnets.

3

Relative Density Sink or Float

Objects with lower density float. Objects with higher density sink.

4

Solubility

Some materials dissolve in water.

Sugar dissolves in water.

5

Conducts Heat or Electricity

Some materials allow heat or electricity to pass through them.

A physical property can be observed without changing what the object is made of.
