

Station 1: Melting Ice

Name _____ Date _____ Class _____

Focus Question

How does adding thermal energy change ice from a solid to a liquid?

Materials

ice cube, cup, thermometer, timer

Procedure

1. Place one ice cube in the cup.
2. Record the starting temperature.
3. Observe the ice for 5 minutes.
4. Record temperature and observations each minute.
5. Decide when melting has occurred.

Record Your Data

Time (min)	Temperature (°C)	Observations
0		
1		
2		
3		
4		
5		

Explain It

1. What phase change took place? _____
2. Was thermal energy added or removed? _____
3. How did the particles change? _____

Safety

Clean up any spilled water right away.
