

Station 2: Where Did the Water Come From?

Name _____

Date _____

Class _____

Focus Question

How do droplets form on the outside of a cold cup?

Materials

clear cup, ice, water, food coloring, timer

Procedure

1. Fill the cup with ice water.
2. Add a few drops of food coloring.
3. Observe the outside of the cup for 5 minutes.
4. Record when droplets appear.
5. Use evidence to decide where the droplets came from.

Record Your Data

Time (min)	Outside of Cup	Evidence
