

Station 3: Race to Evaporate

Name _____ Date _____ Class _____

Focus Question

Which conditions make water evaporate faster?

Materials

water drops, tray or wax paper, small fan, timer

Procedure

1. Place two equal drops of water on the surface.
2. Leave one drop in still air.
3. Place the other drop in front of the fan.
4. Observe both drops for 5 minutes.
5. Record which drop evaporates faster.

Record Your Data

Time (min)	Still Air Drop	Fan Drop
0		
1		
2		
3		
4		
5		

Explain It

1. Which drop evaporated faster? _____
2. Was thermal energy added or removed from the water? _____
3. How did the particles change? _____

Safety

Keep water away from the fan cord.
