

Station 4: Make Frost

Name _____

Date _____

Class _____

Focus Question

How can water vapor change directly into a solid?

Materials

metal can, crushed ice, salt, spoon, timer

Procedure

1. Fill the can with crushed ice.
2. Add salt and stir gently.
3. Observe the outside of the can for 5 minutes.
4. Record when frost appears.
5. Decide what phase change formed the frost.

Record Your Data

Time (min)	Can Surface	Evidence of Frost
0		
1		
2		
3		
4		
5		

Explain It

1. What phase change took place? _____
2. Where did the frost come from? _____
3. How did the particles change? _____

Safety

Do not touch the can for too long with bare hands.

Use observations from the can surface as evidence.
