

Station 5: Melt It, Freeze It

Name _____ Date _____ Class _____

Focus Question

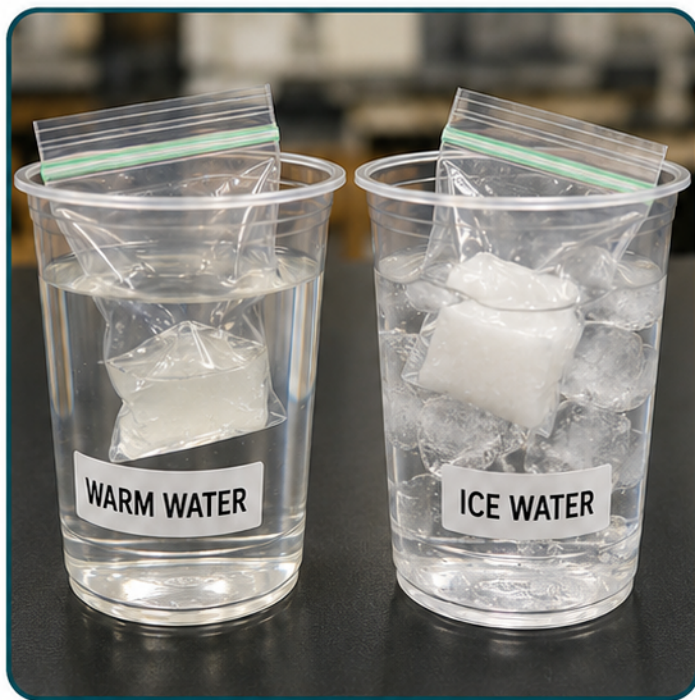

How can a substance melt and then solidify again?

Materials

coconut oil sample, warm water cup,
ice water cup, timer

Procedure

1. Observe the coconut oil at the start.
2. Place the sample in warm water.
3. Record what happens as it melts.
4. Move the sample to ice water.
5. Record what happens as it solidifies.

Record Your Data

Step	Observations	State of Matter
Start		
Warm Water		
Ice Water		

Explain It

1. What changed and what stayed the same? _____
2. When was thermal energy added or removed? _____
3. How did the particles change? _____

Safety

Keep the sample sealed during the activity.
