

Station 7: Teacher Demo - Dry Ice Sublimation

Name _____

Date _____

Class _____

Focus Question

How can a solid change directly to a gas?

Materials

dry ice demo, clear container, warm water, timer

Procedure

1. Watch the teacher set up the dry ice demo.
2. Observe the dry ice and the fog.
3. Record what you notice for 5 minutes.
4. Decide what happened to the solid dry ice.
5. Infer the phase change.

Record Your Data

Time (min)	What You See	What It Means
0		
1		
2		
3		
4		
5		

Explain It

1. What phase change took place? _____
2. Did the dry ice become a liquid first? _____
3. What is the fog made of? _____

Safety

Do not touch the dry ice. Observe only.

Use evidence from the demonstration and class discussion.
