

Earth and Space Printables

Five colorful cue cards for grades 6–8.

★ Visual cues to learn, review, and remember key science ideas.

1 Plate Boundaries

DIVERGENT

Plates pull apart.
Magma rises.

CONVERGENT

Plates collide.
Mountains or volcanoes form.

TRANSFORM

Plates slide past each other.
Earthquakes occur.

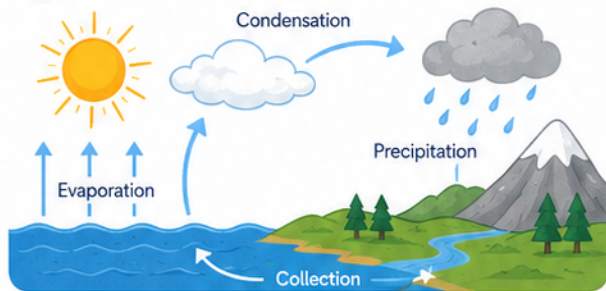

2 Rock Layers and Fossils

Younger
Lower layers are older.
Older

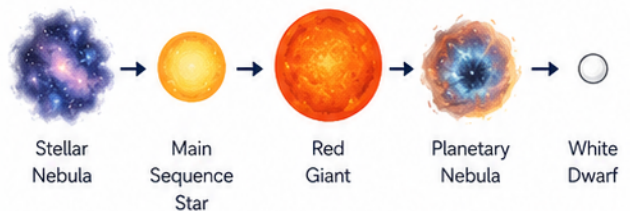

Fossils help scientists find the age and order of rock layers.

3 Weather Systems

Energy from the Sun powers the water cycle and drives weather.

4 Star Life Cycle

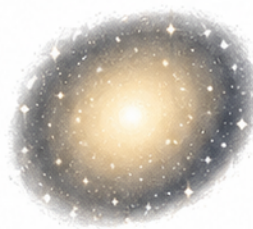

Stars are born, live, and change over billions of years.

5 Galaxy Types

Spiral

Flat, rotating disks with spiral arms.
(Like our Milky Way)

Elliptical

Round or oval shapes with older stars.

Irregular

No clear shape; often caused by collisions.
