

Matter and Energy Printables

Five colorful cue cards for grades 6–8.

1 States of Matter

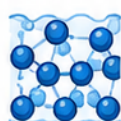

Matter exists in three states.

SOLID

Definite shape
Definite volume

LIQUID

No definite shape
Definite volume

GAS

No definite shape
No definite volume

2 Evidence of Chemical Change

Look for these signs using GTPC.

G

Gas produced

T

Temperature change

P

Precipitate forms

C

Color change

3 Physical or Chemical?

Is a new substance formed?

PHYSICAL CHANGE

No new substance.
Often reversible.

Ice melting

CHEMICAL CHANGE

New substance
is formed.
Often not reversible.

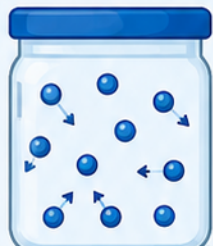

Iron rusting

4 Particle Motion

Temperature affects how fast particles move.

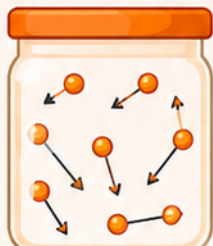

COOLER

Particles move slower.

WARMER

Particles move faster.

5 Conservation of Mass

In a closed system, mass is never created or destroyed.

BEFORE

AFTER

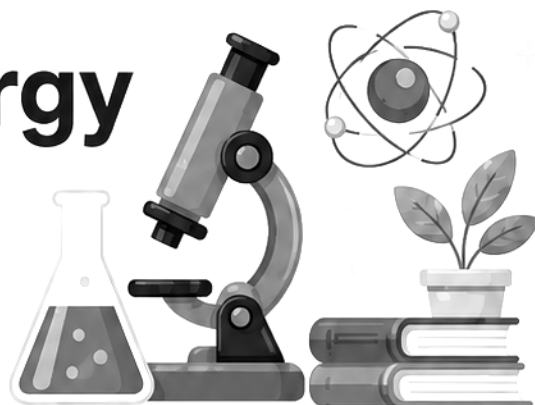

Total mass **before** = Total mass **after**
