

WEATHERING, EROSION, AND DEPOSITION

HOW EARTH'S SURFACE CHANGES

WEATHERING

Weathering
breaks rock into
smaller pieces.

EROSION

Erosion moves
rock and sediment
from one place
to another.

DEPOSITION

Deposition drops
sediment in a
new location.

Weathering breaks it, **erosion** moves it,
deposition drops it.

WEATHERING, EROSION, AND DEPOSITION

HOW EARTH'S SURFACE CHANGES

WEATHERING

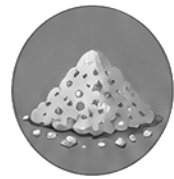

Weathering
breaks rock into
smaller pieces.

EROSION

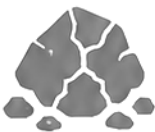

Erosion moves
rock and sediment
from one place
to another.

DEPOSITION

Deposition drops
sediment in a
new location.

Weathering breaks it, erosion moves it,
deposition drops it.
